

MIMESweeper™ Content Filtering

Simplifying email & web policy enforcement at the gateway

The problem

Spam and viruses are only two of the many ways email and the web traffic will damage an enterprise. There are even more serious threats that can't be touched by a traditional anti-spam or anti-virus software approach. These include:

- **Corporate threats** - Confidential leaks and loss of intellectual property
- **Legal threats** - From employees breaking the law (e.g. hate mail, sexual harassment, illegal downloads)
- **Social threats** - Frivolous emailing & web surfing (e.g. pornography, email jokes, shopping & gambling sites)
- **Network threats** - Including zero-day viruses and spyware that wreak havoc before their profiles are distributed by anti-virus vendors

There's only one way to defend against these kinds of threats: filtering all email and web traffic that comes into and leaves the company. And there's only one clear leader in content filtering: MIMESweeper from Clearswift.

The solution

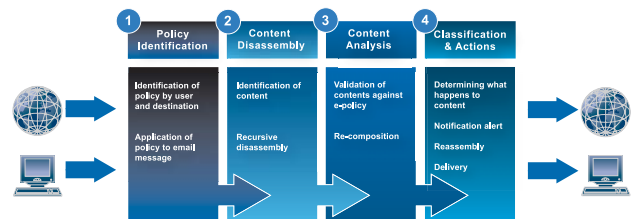

MIMESweeper is the world's leading content filtering and policy management engine. Having pioneered the market, we have gone on to continuously improve the solution, increasing the protection enjoyed by our customers.

MIMESweeper helps companies define their security policies, then enforce them whenever and wherever content moves from one place to another. And since it's available as software, on an appliance or as a managed service, you can deploy the power of MIMESweeper however it suits your organization.

How it works

The MIMESweeper content filtering engine analyzes every email and web download, deconstructing and analyzing every message, web page or download on-the-fly. And the policy management engine automatically invokes the prescribed response to any breach of policy, blocking, quarantining or deleting suspicious traffic, alerting the relevant managers and generating reports. It's that simple.

Content Filtering can be supplemented with URL Filtering, blocking websites that breach company policy. Clearswift's URL database of 18 million URLs in 40 categories makes policy enforcement easy. Anti-virus and anti-spyware are easily integrated in our software solutions and come pre-packaged in the MIMESweeper appliance and managed service ranges.

The MIMESweeper difference

Simplifying content security

MIMESweeper is easy to deploy, manage, maintain and update, with clear, intuitive management tools, rich but simple reporting and automatic updates. MIMESweeper takes much of the security burden from the shoulders of the IT department, freeing up time and resources for activities that add value.

Enterprise-class content security

Unlike the many point solutions, Clearswift offers comprehensive content security designed for the resilience, performance and manageability demands of large enterprises.

NEW! Multi-box Policy Management

Multi-box policy replication makes it even easier for administrators managing multiple appliances. Set the policy on any appliance and the policy automatically replicates to all the others. It's simpler, faster and prevents errors.

For multi-appliance deployments, Consolidated Message Management present users with a single email digest generated from all appliances. Because users shouldn't have to know how many appliances you have.

Granular policy management

MIMESweeper solutions are built around the most powerful policy management engine on the market. Granular policy control applies rules enterprise-wide or by department, region or individual. This lets you design policies that reflect the unique needs of your business. And because compliance is more complex than 'send or block', MIMESweeper now lets administrators set dual disposal actions for any policy. A message might be delivered and sent to an archive; or held and relayed to a named server. The result: improved compliance and better monitoring and policy testing.

Product Highlights:

- World's #1 content security engine
- In-depth content filtering for email and web traffic
- Analyzes every bite of data including attachments & downloads
- Analyzes traffic in all directions - inbound, outbound and internal
- Rules-based security to support the most granular usage policies
- Available as software, on an appliance or as a managed service

MIMesweeper™ Content Filtering

Deeper content inspection

MIMesweeper products analyze traffic recursively, unbundling files deeply embedded within other files. We recognize more file types including compressed and password-protected files, so no message eludes our analysis.

All traffic in all directions

MIMesweeper products cover all web and email traffic, whether it's inbound, outbound or internal. Integrates easily with anti-spam and anti-virus software.

MIMesweeper content filtering works seamlessly with virus-scanning and spam-filtering processes, actually improving their performance and accuracy. Integrate with Clearswift's best-of-breed SpamLogic™ anti-spam or any other anti-spam and anti-virus solution you choose. Or get them all bundled together on the MIMesweeper Email Appliance or the MIMesweeper Web Appliance, which includes anti-spyware and URL Filtering.

Three delivery platforms for customer choice

Clearswift is the only vendor to offer full content security in all three delivery platforms, including as software, on an appliance or as a managed service. While others argue about the relative merits of their delivery platform, we're agnostic, giving our customers the best solutions however they choose to deploy them.

Inbound & outbound email traffic	Internal email traffic	Inbound & outbound web traffic
MIMesweeper for SMTP software	MIMesweeper for Exchange software	MIMesweeper for Web software
MIMesweeper Email Appliance	MIMesweeper for Domino software	MIMesweeper Web Appliance
MIMesweeper Email Managed Service		

How to buy

Clearswift sells through an extensive partner network of qualified security specialists, trained on the MIMesweeper solutions. Visit the Clearswift website at www.clearswift.com/findpartner to find your nearest Clearswift partners, or contact us directly at the numbers below.

About Clearswift

Clearswift simplifies content security. Our products help organizations enforce best-practice email and web use, ensuring all traffic complies with internal policy and external regulations. Our range of content filtering solutions makes it easy to deploy, manage and maintain no-compromise email and web security for both inbound and outbound traffic.

Clearswift is the only vendor to offer comprehensive, policy-based content security in all three deployment methods: as software, as an appliance and as a managed service. All three platforms are designed to take the hassle out of securing internet traffic, with a clear, intuitive management interface; automatic, 'zero-touch' updates; powerful reporting and common-sense policy management.

Twenty years of experience across 17,000 organizations has helped us raise security standards while simplifying security management at the same time. We've helped many of the world's most successful organizations use the internet with confidence and are committed to staying ahead of the market and helping our customers defend against all emerging threats.
