

# MIMEsweeper™ for Web 5.2 Reporting

## Real-time reporting for real-time management. Simplifying content security on the web.

Not only are web threats continually changing, your organization is too. For an IT security policy to be effective, knowing your company and the way it uses the Internet is as important as identifying the threats you face. Included as standard with MIMEsweeper for Web, the Reporting module gives you total insight into how your business interacts with the web.

MIMEsweeper for Web comes complete with pre-defined and comprehensive reports viewable by secure connection from any standard web browser. The detailed and insightful graphical reports let you map trends, understand networks, monitor traffic changes and analyse user behaviour. It's never been easier to:

- Accurately analyze all web use in your company
- See at a glance which websites are accessed most often and by whom
- View real-time statistics on all users currently online
- Audit and report on all web traffic
- Identify periods of peak web use during the average working day
- Monitor threat detection according to site, user and time period
- Fine-tune your policy to reflect the exact threats you face
- Improve capacity planning, efficiency and cost reduction
- Demonstrate ROI using graphical reports

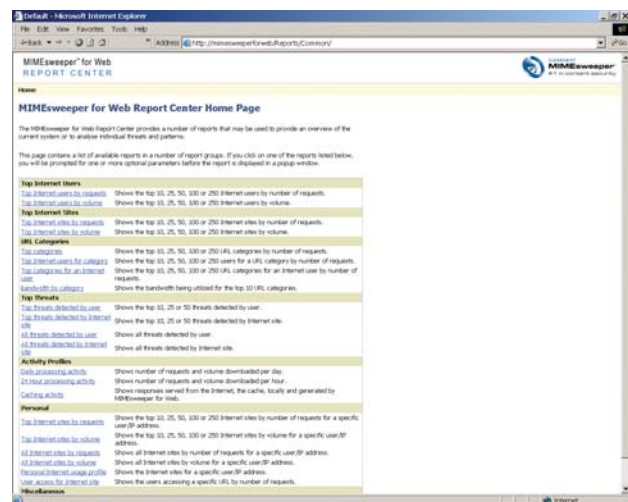

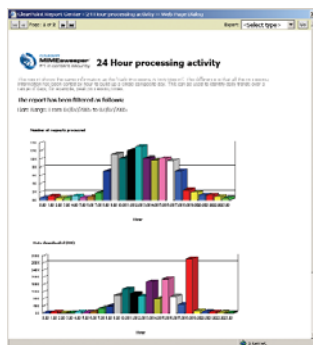

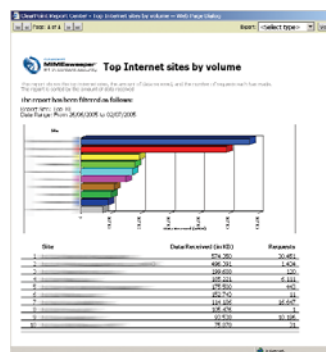

Figure 1: Main Report Center Menu

**Figure 2: 24 Hour Processing Activity**  
 Processing information sorted by hour gives you a composite view of the average working day, making it simple to identify peak access periods and trends over time.

**Figure 3: Top Internet Sites by Volume**  
 Displays the most popular websites, the total data size received & the number of requests made. Results are ordered by data size received.

**Figure 4: Top Internet Users by Request**  
 Shows the top Internet users, the number of individual requests & the total data received. The report is ordered by data received, high to low.

### Product Highlights:

- Real-time display of current web traffic
- Full auditing & reporting of all transfer requests
- Assess threats according to site, user & time
- Refine your IT security policy
- Demonstrate ROI at a glance using graphical reports
- Viewable by secure connection from any web browser

## MIMESweeper™ for Web 5.2 Reporting

### Reports available

### About Clearswift

Clearswift simplifies content security. Our products help organizations enforce best-practice email and web use, ensuring all traffic complies with internal policy and external regulations. Our range of content filtering solutions makes it easy to deploy, manage and maintain no-compromise email and web security for both inbound and outbound traffic.

Clearswift is the only vendor to offer comprehensive, policy-based content security in all three deployment methods: as software, as an appliance and as a managed service. All three platforms are designed to take the hassle out of securing internet traffic, with a clear, intuitive management interface; automatic, 'zero-touch' updates; powerful reporting and common-sense policy management.

Twenty years of experience across 17,000 organizations has helped us raise security standards while simplifying security management at the same time. We've helped many of the world's most successful organizations use the internet with confidence and are committed to staying ahead of the market and helping our customers defend against all emerging threats.
