

MIMESweeper™ URL Filter

Advanced URL filtering, simplified.

The MIMESweeper for Web URL Filter is an optional plug-in to the MIMESweeper for Web 5.2 content filtering solution and is built-in to the MIMESweeper Web Appliance. URL filtering - also known as URL blocking - protects network integrity by blocking web-access in accordance with your IT security policy and a database of categorized URLs.

URL filtering is an essential component of a 'safe surfing' environment. While it cannot promise to provide 100% protection used in isolation, as part of an integrated, layered approach to web security, URL filtering is an ideal complement to content filtering.

The most comprehensive URL database available

The heart of any URL filter is its database. Updated on a daily basis, the Clearswift URL list is widely regarded as the best in the industry:

Comprehensive

Contains more than 18 million URLs comprising of billions of web pages monitored by a professional research team using state of the art automated tools and real world customer submissions.

Policy-friendly

By providing 40 comprehensive categories of site (such as pornography, gambling, auctions, webmail, etc), your policy is easily and accurately enforced.

Global

Covers sites across many countries in more than 50 languages for safe surfing the world over.

Updated daily

Daily updates means thousands of new URLs are added each week and existing URLs are culled as appropriate so your protection is always current and relevant.

The MIMESweeper URL Filter is the most advanced technology of its kind. No other solution is as sophisticated or well integrated.

- Based around the world's leading URL filtering database
- Customizable to IT security policy
- Scalable to network, work group or individual
- Filtering can be time sensitive to allow after-hours surfing for instance
- URLs are categorized by both domain and page –
www.foxnews.com is classified separately from www.foxnews.com/sports
- Database is updated daily by professional web researchers
- Updates are automatic, reducing administration burden on IT managers

How does it work?

The URL Filter polices every requested transmission across the HTTP gateway to combine seamlessly with the content filtering capabilities of MIMESweeper.

Product Highlights:

- The most advanced URL filter available
- Based on a database of over 18 million URLs
- Validates every web transfer request
- Customizable to your IT security policy
- Scalable to network, work group or individual
- Automatically updated every day
- Integrates with MIMESweeper for Web 5.2
- Regulates web access for productive use

About Clearswift

Clearswift simplifies content security. Our products help organizations enforce best-practice email and web use, ensuring all traffic complies with internal policy and external regulations. Our range of content filtering solutions makes it easy to deploy, manage and maintain no-compromise email and web security for both inbound and outbound traffic.

Clearswift is the only vendor to offer comprehensive, policy-based content security in all three deployment methods: as software, as an appliance and as a managed service. All three platforms are designed to take the hassle out of securing internet traffic, with a clear, intuitive management interface; automatic, 'zero-touch' updates; powerful reporting and common-sense policy management.

Twenty years of experience across 17,000 organizations has helped us raise security standards while simplifying security management at the same time. We've helped many of the world's most successful organizations use the internet with confidence and are committed to staying ahead of the market and helping our customers defend against all emerging threats.
