

InterScan™ Messaging Hosted Security

Integrated email threat protection in a hosted service

Companies are experiencing a dramatic increase in email-based attacks on their messaging infrastructure and network resources. Spam, spyware, phishing, botnets, zombies, targeted email attacks, and blended-threat attacks not only sap employee productivity, they endanger company networks. These threats can also expose organizations to data leakage, compliance issues, and legal risks. To combat these wide-ranging email threats, organizations need a comprehensive messaging security solution that stops threats before they penetrate the network.

Trend Micro InterScan Messaging Hosted Security integrates multi-tiered anti-spam and anti-phishing with award-winning antivirus and anti-spyware, blocking standalone, blended-threat, and customer-specific attacks. You can choose the service level that best suits your security strategy with either streamlined management for complete security with minimal administration or granular access and control with content filtering to enforce compliance and prevent data leakage. Both service levels offer comprehensive hosted email security to block threats before they can touch the network, securing the network and saving bandwidth, storage, and other resources.

HOSTED SERVICE

Protection Point

- Messaging Gateway

Threat Protection

- Anti-Spam
- Antivirus
- Anti-Spyware
- Anti-Phishing
- Content Filtering

BENEFITS	FEATURES
Multi-Tiered Spam and Phishing Defense	<ul style="list-style-type: none"> • Email Reputation blocks spam before reaching the gateway using the world's largest, most trusted reputation database while dynamic reputation services stop zombies and botnets as they first emerge • Anti-spam composite engine combines multiple protective techniques including patent-pending image spam technology and embedded URL reputation • Multi-lingual spam detection improves protection for global companies • Anti-phishing leverages signatures, heuristics, and reputation services to stop phishing, including corporate spear-phishing attacks
Award-Winning Antivirus Security	<ul style="list-style-type: none"> • Award-winning technology and TrendLabs provide 24x7 protection • Zero-day protection blocks unknown and targeted virus attacks • ActiveAction antivirus technology automates recommended virus responses • Anti-spyware stops targeted spyware attacks sent through email
Easy Management	<ul style="list-style-type: none"> • A simple redirect of the MX record achieves quick deployment • No email security hardware or software is needed, reducing infrastructure, costs, and administration • Choice of management levels meets varying administrative needs with either granular access and control or streamlined management • All updates and tuning are conducted for the customer by Trend Micro • Message tracking and detailed reports provide in-depth insight into the system • Web-based End-User Quarantine enables end users to manage their own spam
Flexible Content Filtering (Advanced Service only)	<ul style="list-style-type: none"> • Content filtering supports regulatory compliance, aids corporate governance, and prevents data leakage • Content filters scan emails and attachments • Filters identify content by attachment characteristics, keywords, lexicons, and customized data rules • Policies target senders or recipients by company, group, or individual • Policy actions provide flexible remediation options including company-specific legal disclaimers

InterScan™ Messaging Hosted Security

EMAIL CONTINUITY

InterScan Messaging Hosted Security ensures optimized performance and high availability, providing organizations with uninterrupted security.

- Minimal latency and guaranteed privacy ensure continuous, secure uptime
- Geographically distributed data centers use fully redundant, load-balanced systems
- Automatic back-up saves emails when the customer system is unavailable
- Extensive SLAs cover availability, performance, and support

TRUST THE EXPERTS IN THREAT PROTECTION

As a recognized leader in gateway secure content management, Trend Micro has created a comprehensive multi-layer hosted service that brings together the best in spam blocking, antivirus, content control, and system monitoring. Trend Micro InterScan Messaging Hosted Security is powered by TrendLabsSM a global network of research centers that ensures constant threat surveillance and attack prevention. With accurate, real-time data, TrendLabs delivers effective, timely security measures designed to detect, pre-empt, and eliminate attacks.
