

Trend Micro Control Manager™

Centralized Threat Management Console

Today's malware uses sophisticated and often blended methods to infiltrate and attack multiple points on your enterprise network. This trend dramatically increases the complexity of managing threat protection and enforcing security policies across multifaceted environments. Without a single interface to simplify enterprise-wide coordination of security actions, administrators are quickly overloaded with complicated management and administration.

Trend Micro Control Manager offers proactive, comprehensive threat protection with centralized administration for security updates, patch deployment, coordinated response, and remote management capabilities for Trend Micro products and services. Unlike security solutions that require a different management console for each point product, Trend Micro Control Manager acts as a central command center for deploying threat-specific expertise across the network and select third-party products.

Control Manager's exclusive multi-tier management structure delivers the flexibility and scalability to support large-scale enterprise deployments. Robust graphical reporting equips you with vital insight into the sources of infections or vulnerabilities with consolidated, detailed data.

ENTERPRISE-WIDE COORDINATION

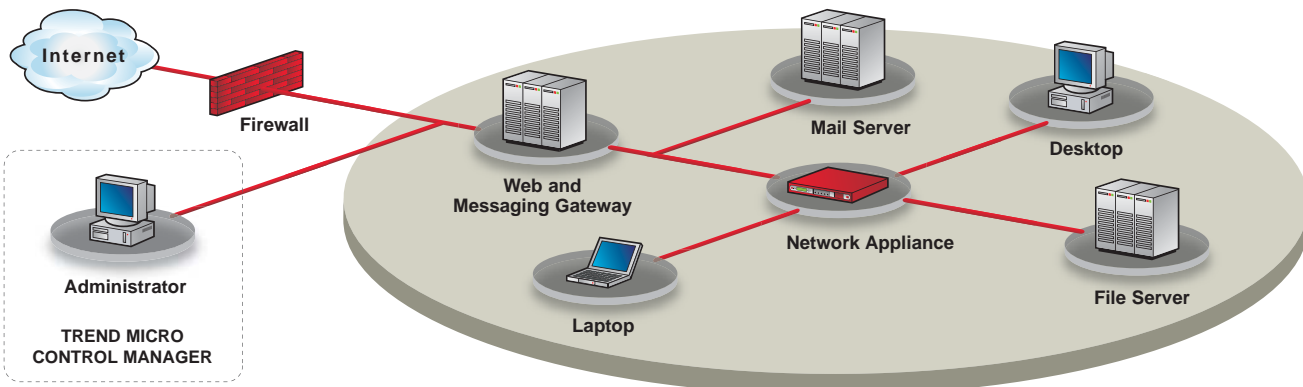

- Unifies your view of enterprise-wide security with centralized management capabilities
- Provides a single console to configure, monitor, and maintain Trend Micro products and services installed on the network
- Enforces proactive outbreak management by simultaneously deploying consistent policies to Trend Micro products and services throughout the network

KEY BENEFITS

- **Single, Web-based console**
Simplifies enterprise-wide coordination of Trend Micro products
- **Centralized deployment**
Correlates vulnerabilities with potential attacks, deploys threat-specific prevention policies, and automates cleanup
- **Multi-tier management**
Provides a unified, customizable view of enterprise-wide security for maximum scalability, and flexibility*
- **Automated protection**
Minimizes damage from attacks by deploying security updates and outbreak prevention policies throughout the network
- **Robust graphical reporting**
Provides vital activity information including infection sources, virus events, or unusual activities

* Available in Enterprise Edition

Trend Micro Control Manager can deploy proactive, industry-unique services, which deliver Trend Micro knowledge and expertise to critical points on the network.

Trend Micro Control Manager™

MULTI-TIER MANAGEMENT STRUCTURE

- Provides a single console to configure, monitor, and maintain Trend Micro products and services installed on the network
- Consolidates data from multiple Control Manager servers into master views for central management and enterprise-wide visibility
- Provides a unified view of critical security activity by collecting data logs from multiple Control Manager servers to create a single, consolidated report

ROBUST REPORTING¹

- Gathers information on virus events or unusual activity from installed servers throughout the network
- Provides targeted data to help pinpoint sources of infection or re-infection, analyze patterns of infection, and reinforce outbreak protection policies
- Generates graphical reports for an in-depth view of activity tracking and analysis
- Includes built-in templates to create multiple reports in PDF, RTF, HTML, or Crystal Reports™ formats (separate software and license required for Crystal Reports)

FLEXIBLE AND SCALABLE CONFIGURATION

- Organizes supported antivirus servers into groups that can be remotely configured through a Web-based browser
- Enables servers to be configured simultaneously in groups or through individual replication
- Mirrors product information and task functions of installed products for true single-console management capabilities

PROACTIVE OUTBREAK MANAGEMENT

- Can be configured to automatically or manually download and deploy proactive, threat-specific policies from Trend Micro™ Outbreak Prevention Services
- Helps you deflect, isolate and stem outbreaks using attack management recommendations
- Enables configuration of outbreak prevention policies based upon high or medium virus risk profiles, using enhanced automatic outbreak prevention mode

¹ Available in Enterprise Edition

Trend Micro, Inc.

Trend Micro Incorporated is a pioneer in secure content and threat management. Founded in 1988, Trend Micro provides individuals and organizations of all sizes with award-winning security software, hardware and services. With headquarters in Tokyo and operations in more than 30 countries, Trend Micro solutions are sold through corporate and value-added resellers and service providers worldwide. For additional information and evaluation copies of Trend Micro products and services, visit our Web site at www.trendmicro.com

Trend Micro™ Enterprise Protection Strategy

Trend Micro Control Manager™ is a key component of the Trend Micro Enterprise Protection Strategy, which combines multiple layers of products and services for intelligent, comprehensive protection against known and unknown threats. This security framework includes innovative new solutions that monitor customer-specific networks and accurately detect unknown threats in real time. Tightly-integrated, centrally-managed security enables seamless inter-product collaboration to guard every network endpoint.

SYSTEM REQUIREMENTS

Hardware Requirements

- Intel™ Pentium™ 4 Processor, 1GHz or higher
- 512MB RAM
- 300MB disk space (for Control Manager Standard Edition)
- 50MB disk space (for Control Manager Enterprise Edition)
- 300MB for MSDE 2000 (Optional)

Software Requirements

Server

- Microsoft Windows 2000 Server/Advanced Server with Service Pack 3, Microsoft Windows Server 2003 Standard Edition/Enterprise Edition

Web Server

- Microsoft Internet Information Server (IIS) 4.0 or higher

Database—Any of the following:

- Microsoft Data Engine (MSDE) 1.0/2000 (2000+Service Pack 3 is recommended), Microsoft SQL Server 7.0, Microsoft SQL Server 2000 (2000+Service Pack 3 is recommended)
- Others—SQL ODBC driver 3.7 or higher
- Windows Installer (included in Control Manager package)

Agent

Please see product documentation for detailed information. To get the newest agents supported by Control Manager visit www.trendmicro.com/en/products/management/tmcm/evaluate/requirements.htm

Management console

- Microsoft Internet Explorer 6.0 or higher
- Microsoft Version 5.0.0.3805 or higher
